Technical Skills

Technical: Python, C++, HTML, CSS, JavaScript, React, FastAPI, REST APIs

Experience

EzPaint / [Project Github](#)

Developed: March 2024-May 2024

Ezpaint is a simple C++ application designed for creating and editing digital artwork on a canvas. Users can draw using various colors, save their work as PNG images or XML files, and load XML files to continue editing. The project provides basic drawing functionality and file management features, making it a helpful tool for quick sketches or simple graphic design tasks.

Technologies & Frameworks Used:

- **C++:** Core programming language for application logic.
- **wxWidgets:** GUI framework for building the drawing interface and managing file operations.
- **Visual Studio:** IDE used for development and project management

Python-Applications / [Python Projects](#)

A collection of projects I worked on while learning Python. Each project is a learning experience, allowing me to explore various concepts, techniques, and libraries within the Python ecosystem.
